Re: **Elimination of the Seasonal Rate Class- EB-2020-0246**

Dear Sir/Madam:

I am writing this letter to express a concern with your proposed plan for the elimination of the Seasonal Rate Class in a report filed on October 15, 2020. This proposal will see our seasonal hydro rates increase substantially for our family.

Our seasonal residence has always been operated as a rural cottage with only seasonal uses (not in the winter months) since the 1960's. We are also low monthly electricity users which is an appropriate fit for our current *seasonal classification*.

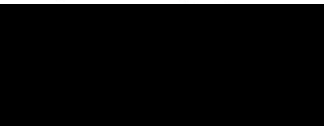

We were very surprised to receive this notification concerning increased costs by moving our premise into an R2 classification.

The Stanley family is requesting that the Ontario Energy Board not proceed with this reclassification as it does have a negative impact on true seasonal users.

Yours truly,

Ralph Stanley
