Hello OEB.

I understand you are intending to eliminate the seasonal rate class. My primary residence is formally Toronto but we have been spending 80% of our time at our cottage for the past year, mostly due to the pandemic.

Since my area is low density, I've a strong suspicion that I will be one of those people whose bills will double. We already pay an enormous amount for delivery (around \$10 usage/mth vs around \$125/mth delivery). This will definitely have an impact on me, particularly as I am looking at retirement in the next year.

Please give me a good reason why OEB is looking to condone GAUGING clients like me.

Thank you.

Helene Kay
