Concern about the change from seasonal to low density will increase my hydro bill by more than 100%. I close the cottage in October and don't reopen till May since I have no access to it. I turn my main breaker off so there is no power to the building but still pay for delivery. My concern is now the cost to going to R2 class and paying that much more for something not being used in the winter. I understand the delivery - I don't understand the drastic increase by the board.
