OEB file no. EB-2020-0246.

To Whom It May

Concern : We are opposed to the elimination of the seasonal rate class.

We have owned our cottage since 1968 and now owned by the second generation hoping to pass along to our third generation. Our cottage use is at @ 5 months out of the year as it is not winterized. At the present seasonal rating system, we feel the present delivery charge is too high in the winter months as it is, when no hydro is in use. Our cottage area is surrounded by more full-time residents all the time, farms and smaller communities/businesses to maintain Hydro One's needs throughout the remainder of the year. As a seasonal owner, we feel we should not be penalized to full higher year round rates at Hydro One's whim as they are the sole provider in our province. We hope that the OEB review and hearing would favour in the best interests of the Ontario seasonal owners.

Regards. D. Waterton
