Account [REDACTED]

To whom it may concern,

I own a seasonal Lakefront lot with a trailer hook up to my 10' x 10' bunkie.

My family uses it over the summer time occasionally in July & August. Our hydro use is extremely low.

When we installed the service a decade ago we paid for a hydro pole, a transformer, and the hook up of service.

If you eliminate the Hydro One Seasonal Rate Class our monthly payment will increase by more than 100%, more than double our current monthly rate.

This is bordering on criminal, completely unfair, and an increase of this nature should never be allowed.

I am strongly opposed to this action by Hydro One Network Inc, and would request that the "Ontario Energy Board" not support the elimination of the "Seasonal Rate Class".

Kindest Regards,
Paul Fournier, MBA
