We strongly object to the proposed rates which will place us in the R2 category, so we will see our rates jump 100%. This is grossly unfair to us the property owners, considering almost all my neighbours on our cottage road are year round residents, so why does my rate have to increase. It is not like they are running a separate line to my property. In fact the main hydro line for our road, runs thru my property to reach the rest of the full time residents on our road. Just because we choose not to live at our property year round, we should not be penalized. Hydro one is already making money from us from our permanent residence which is not far away. As it is, our winter hydro bills are very high with 0 kilowatt hours being used, as the delivery fees are ridiculous. My neighbours past me on our cottage road pay a lower delivery charge than we do. If hydro ONE would like to financially sponsor me to upgrade my cottage to a year round residence, I will gladly move their full time,
