Subject: Eliminating seasonal rate class (EB-2020-0246}.

Dr Sir. I find from your letter the proposal to eliminate the seasonal rate ridiculous. From your chart my consumption would result in a bill of \$114.13. Thats an increase of over 100%. This property is on Parry Island in Parry Sound and is owned and governed by Wasausink First Nation. Wasausink Nation enjoys a lower hydro rate with NATIVE CARD STATUS. 250 cottage lots are leased to promote an industry to help First Nation become self-sufficient. We have no say in the development density or qualify for a status discount. SO, I feel strongly discriminated against by this proposal. I truly hope you take this situation under advisement for the good of all of Ontario. Your chart severally discriminates against low density. Which is all rural Ontario.

Thank You.
