## VIA EMAIL and RESS

Ms. Christine E. Long Registrar Ontario Energy Board 2300 Yonge Street, 27th Floor Toronto, ON M4P 1E4

Dear Ms. Long:

### Re: Enbridge Gas Inc. (Enbridge Gas) Ontario Energy Board (OEB) File No.: EB-2020-0192 London Line Replacement Project – Change Request No. 1

Please find attached Change Request No. 1 as submitted by Enbridge Gas for the London Line Replacement Project (the Project).

Enbridge Gas is filing this Change Request pursuant to Condition of Approval No. 7 of the OEB's EB-2020-0192 Leave to Construct Decision and Order dated January 28, 2021.

As detailed in Attachment 1 (Change Request Form), Enbridge Gas requires additional temporary land use rights (TLU) to allow for modified construction methods in several locations along the London Line Replacement Pipeline Project (the Project) area. These sites are required to facilitate newly identified construction and installation methods. In areas where there is insufficient room in the road allowance to complete the trenchless installation method, additional TLU is required to allow the crews a work space to house equipment, store materials and work safely. Some of the TLU areas have also been reduced in size as Enbridge Gas continues with the detailed design and looks for opportunities to minimize impact to the environment.

As part of this Change Request, Enbridge Gas is also attaching an Updated Detailed Pipeline Map and Updated Landowner Line List.

The names and addresses of landowners have been removed to safeguard the landowner privacy from the following exhibits:

- Updated Landowner List Attachment 2
- Updated Proposed Pipeline Location Maps Attachment 3

The confidential or unredacted exhibits will be provided to the OEB under separate cover.

March 10, 2021 Page 2

Due to the rational for this request, Enbridge Gas respectfully requests a timely review and approval of this request.

Should you have any questions concerning this submission please contact the undersigned.

Yours truly,

Rakesh Torul Technical Manager, Regulatory Applications

c.c.: Z. Crnojacki (OEB Staff) P. Duguay (OEB Staff)

Filed: 2021-03-12 EB-2020-0192 Change Request Attachment 1 Page 1 of 2

## CHANGE REQUEST

Project Name: London Lines Replacement Project

OEB File Number: EB-2020-0192

Change Request: 1

# **Description and Rationale for Change**

Enbridge Gas requires additional temporary land use rights (TLU) to allow for modified construction methods in several locations along the London Line Replacement Pipeline Project (the Project) area. These sites are required to facilitate newly identified construction and installation methods. In areas where there is insufficient room in the road allowance to complete the trenchless installation method, additional TLU is required to allow the crews a work space to house equipment, store materials and work safely. Some of the TLU areas have also been reduced in size as Enbridge Gas continues with the detailed design and looks for opportunities to minimize impact to the environment.

Some land purchases have been identified for stations that are increasing in size due to equipment requirements for the pipeline to operate at 3447 kPa.

Some areas of permanent easement are required to install the small sections of the pipeline outside of road allowance due to streetline inconsistencies.

# **Construction and Restoration Practices**

No impact to construction and/or restoration practices

### Environmental

As per MHSTCI guidelines, an archaeological assessment will be completed on sites that were not included in the original filing.

### Consultation

Consulted with the affected landowners to secure the necessary land rights.

### Lands

Enbridge Gas will pursue and acquire the necessary land rights from the landowners.

# Costs

The additional TLU required has no material impact to the overall Project costs.

Filed: 2021-03-12 EB-2020-0192 Change Request Attachment 1 Page 2 of 2

# Schedule

No impact to the in-service date

# Attachments

Attachment 1 – Change Request Form

Attachment 2 – Updated Landowner Line List showing the land right changes. Changes from the version filed in the original filing are indicated in red.

Attachment 3 – Updated Proposed Pipeline Location Maps showing the total set of land right areas. New land rights, included areas that have been reduced in size, have been highlighted with a bright blue shading. Existing land rights are shown in green hatching for temporary land and red for permanent easements or land purchases.
