I am objecting to 100% Hydro supply increase in our area after our account will be moved to [R2] class -low density classification.

We have a seasonal dwelling in this area , hydro being supplied appx. 6 months of the year.

Full time residents receiving services year round should be charged increased rates for the distribution of electricity.

100% increase in charges does not represent your goal of supplying reliable energy services at a reasonable cost.
