I own a property adjacent to Killbear Park. The area has been designated Residential - LOW Density under the new pricing regime, despite the fact that within a 2 1/2 km radius, we have 124 residences, Killbear Park with 277 electrified campsites (camps are considered residences by Hydro One) and a marina with 75 electrified slips. We feel that our energy usage is quite concentrated.

Hydro One has advised that Killbear Park and Killbear Marina each count as ONE (1) customer, despite having multiple users. To count 277 users as one customer seems both arbitrary and unfair.

LOW Density will result in up to 100% increases in hydro costs. We ask that you alleviate this potentially onerous increase in hydro costs in two ways:

1. In view of the CONCENTRATION of users, re-designate our area as Residential - MEDIUM Density.
2. Reconsider the assignment of costs under the LOW Density designation to something more manageable.
