

February 25, 2021

To whom it may concern,

My name is Bruce M. Baker, account number [REDACTED] and I am writing concerning the elimination of Hydro One Networks Inc's Seasonal Rate Class (EB-2020-0246.

My family has a cottage in Rondeau Park, Ontario. The cottage has been in the family for close to 100 years. It is a seasonal cottage and used only for a few months in the summer. I live in Michigan. As a result of the covid virus, I have not been able to use the cottage for over 1 ½ years and do not expect to be able to cross the border for many more months.

I still have been paying the electric bill to Hydro One even though I have not been able to even get to cottage. I have been charged for the electricity even though the electricity has been turns off for the above period to time. I have spent over \$400 in 2020. When I view the bill it is hard for me to justify why I am responsible for the price I'm required to pay. I understand that it requires funds to maintain and deliver power. Hydro One does more than an adequate job of fulfilling this need. (Inspite of some of my Canadian friends telling me that the price of electricity in Ontario has been excessive.)

I see only one reason for this proposal to go into effect. That is to generate additional funds. It has been stated that the current status of Seasonal Rate Class is unfair. I am more then happy to pay for my electricity. Yet how can it be fair to have to be put into another category when I am not using comparable electricity. Hopefully this letter will be considered and taken seriously.

Bruce M. Baker
