Dear Ms. Long - 2020-0246

I have recently purchased a small cottage near Lake Huron. It is a seasonal cottage and it is not used between November -April.

I have been notified that due to a zoning change from Seasonal to R2 class my electricity bill will increase by 100%. It seems like the less hydro you use, the greater the increase? Totally unacceptable for all involved.

I would like to register a strong protest against your plan which is extremely unfair and adding significant cost of my annual hydro bill.

Phasing in increases over a period of time is highly recommended and should be a consideration for all involved.

This would assist in the financial hardship that will be faced by many seasonal owners.

Sally Brodie
