We own a cottage at the following address:

[REDACTED]

We strongly oppose Hydro One's elimination of the Seasonal Rate Class we are now under.

We are in residence at our cottage on weekends from April through October with one full week in August. By changing our status at this time we fear our rates will increase dramatically, and if not dramatically at this time, even a slight increase would put a burden on our monthly budget. I realize that cottage owners may be considered to be in an economic class that can whether the burden of increases in utility fees. However, we simply cannot. We are balancing everything to the best of our ability. With the substantial increases in almost all other costs of living that have occurred over the last year including food, property taxes etc. , this additional increase will put us at a tipping point. We are sure we are not the only ones in this situation. Please believe us and take this into consideration.

Thank you so much,  
Nathan Brown
