As an account holder of a seasonal property located at [REDACTED], I am requesting that the seasonal property rating class not change. If it moves to low density (R2) class our bill will increase 132%! During this economic hard times and pandemic, people do not have the disposable income to manage a small increase nevermind such a significant increase. This will effect everyone's budget negatively.  
Very unhappy with this and hope you will not follow through with this.
