As a seasonal customer of Hydro One I believe it is unfair to move all seasonal customers to Low density (R2) class which has the potential to increase our bills by 100%. This is a significant increase that a number of us will find very hard to handle. If increases are required then the burden should be to all users not just one class of users. Hydro one should look for more efficiencies to provide a more cost effective service for its customers.
We are your customers.
