As a seasonal property owner I would like to make some observations regarding the delivery charges on my Hydro One bills.

On the quarters Sept. - Dec. 2019, Dec. - Mar. 2020, Sept. - Dec. 2020, I used no electricity. The delivery charges on those successive bills were \$122.31, \$136.53 and \$139.02. A massive 13.5% increase for delivery on "no usage" bills in one year.

It seems the reclassification has been begun in stealth.
