I believe that this elimination of the seasonal rate class is totally unfair. As property owners of Seasonal dwellings we are already paying exorbitant deliver charges, and we are paying these charges even when we do not use electricity. This is just another way of taxing rural properties to pay for the ill conceived schemes of solar and wind power generation. The infrastructure that we use has (or should have been paid for had Hydro One done proper accounting and used surcharges) paid for many times over. The present delivery charges are more than enough to pay yearly maintenance on these lines. I strongly urge the board to leave the Rate classes as they are.
