I am appalled at the decision the oeb has made,without contacting the homeowner. This is highway robbery how can they do this with all that we are going through with this pandemic. Its not enough with the stress of the pandemic how it has effected us monetarily physically and mentally, now they have to put this additional burden on us when we haven't been able to even use our property.This is not right please reconsider we are going through enough. How is it right to charge someone for something that is not being used . I'm pissed excuse my language!
