**Subject:** Hydro increase

OEB Canada,

The dramatic increase in electricity delivery will have a negative impact on the quality of life for people who own cottages for decades in the Madawaska region. Electricity, is a human right and people should not be taken advantage of and forced to sell their cottage due to a 54 per increase dictated by the OEB.

OEB, states how well its working to meet the needs of energy consumers. Unfortunately, not all energy stake holders are treated equally. OEB, has decided who will bear the burden of biased price increases.

We respectfully request that this be revisited and our concerns taken seriously before any further decisions are made.
