Subject: Rural rate increase

Gentlemen/ Ladies:

Of course we are not pleased about the proposed 50%+ increase in our Hydro Bill for our summer cottage on Long Lake (24 Martin Drive). We spend only a few months there each year and already pay heavily.

Like most of our neighbours, we are living on a fixed income. The zoning is "seasonal", and that means that we cannot use electricity all year the way "rural" residents do. We are not there to do that.

If a rate increase is necessary, it would be more fair to raise it at a certain level across the board for everyone.

Graeme S. Mount.
