Dear registrar

I have tried calling the number provided but unfortunately it is only for Ontario residents.

I have spoken to Hydro One and found out that they made 3 proposals to mitigate the price increase that you are implementing which were all rejected by your organization. I am certainly not happy with the monthly base rate now and a jump of 270% is something I will actively fight and rally against. I also understand that you have rejected giving us any of the benefits in those 3 categories proposed. I understand Hydro One's concerns and please register me to be an intervenor.

Should a mutually beneficial resolution to this problem not be reached I think that I am not alone in switching to propane/solar and eliminating you all together. I look forward to hearing your position as an intervenor.

Kind regards
Valerie Danish
