Operator Only. Please identify owner		
10.	Facility History and Status	
ls th	ne facility in commercial service?	
_	Yes, proceed to section 10(a) No, proceed to section 10(b) or 10(c) as applicable.	
(a)	Existing Facility in Commercial Service When did this facility achieve commercial operation? Is the applicant the original owner and operator? Yes No, identify previous owner and operator:	
	New Facility Has facility construction commenced?	
	✓ Yes	
	□ No	
	What is the expected commercial in service date? March 29, 2021	
(c)	Existing Facility NOT in Commercial Service	
	What is the expected commercial in service date?	
	Please provide a list of all other regulatory approvals required (e.g. environmental, municipal, etc.). Please identify the status of each approval.	

11. Connection What is the voltage at the perimeter of the applicant's property from the output of the storage facility? 50 kV or less, proceed to section 11(a) greater than 50 kV, proceed to section 11(b) (a) The OEB Act defines a "distribution system" as a system for distributing electricity, and includes any structures, equipment or other things used for that purpose. "Distribute", with respect to electricity, means to convey electricity at voltages of 50 kV or less. Describe the existing or future distribution system from the output of the storage facility to the connection point with the electricity distributor or to the connection point with the transmission system (e.g., length of line, transformers, etc.). The storage facility is connected to the distribution system at 12.5 kV with a motorized disconnect switch, high voltage interrupter, 1500 kVa ONAN padmount transformer and utility metering. The distance from the battery to the connection point with the distribution system is approximately 20 metres. Does (or will) the applicant own and/or operate the distribution system? ☐ Yes Lakeland Power Distribution Ltd. No, identify the owner and/or operator of the distribution system If yes, does the applicant own and/or operate the distribution system only for the purpose of conveying electricity from the storage facility to the IESO-controlled grid? ☐ Yes No, describe the purpose of the distribution system If the answer to the question above is no, the applicant may require a distribution licence. The application form can be found at www.oeb.ca. Does (or will) the distribution system connect the storage facility to an electricity distributor? Yes, identify the electricity distributor No, proceed to section 11(b) (b) The OEB Act defines a "transmission system" as a system for transmitting electricity, and includes any structures, equipment or other things used for that purpose. "Transmit", with respect to electricity, means to convey electricity at voltages of more than 50 kV.

Describe the existing or future transmission system from the output of the storage facility or applicant's distribution

system to the connection point with the transmission network (e.g., length of line, transformers, etc.).

March 2015

Does (or will) the applicant own and/or operate the transmission system?
☐ Yes
☐ No, identify the owner and/or operator of the transmission system
If yes, does the applicant own and/or operate the transmission system only for the purpose of conveying electricity from the storage facility to the IESO-controlled grid?
 ☐ Yes ☐ No, describe the purpose of the transmission system
No, describe the purpose of the transmission system
· · · · · · · · · · · · · · · · · · ·

If the answer to the question above is no, the applicant may require a transmission licence. The application form can be found at www.oeb.ca.
