We received a notice that our seasonal residence will now be changed to Urban Residence our property is not a full time residence, no potable water, only holding tank for sewer..cottage is not insulated for winter use..on piers.

you are asking us to pay monthly regardless if we are there Through those winter months...

Why are we losing our seasonal rates..does not make sense..

We were told increase in rates by 20% this next year...and another 20% over next few years,we are pensioners on fixed incomes.. no incomes or pensions will increase the same as the increasing for our hydro over the next following years..

We are NOT in agreement with this proposal .

It is a seasonal property and want it to remain that way. We have a principal residence which is where we spend the majority of our time.

Why do we need to pay residential urban rates on both properties.
