DEAR SIR,

RE: SEASONAL Hydro Customer
[REDACTED]

My wife & I are both seniors well over 70 years old.
We are very upset that another hydro hike is on
the horizon. WHY?

Reason: Last year Approx cost 493⁰⁰

Approx. 100⁰⁰ in actual use of electricity
" 393⁰⁰ in delivery

When are the Hydro poles & electric lines repaid
for that have been in place for a century???

Annually a crew come by - inspect & clear any
dead branches, that is all the maintenance that we
see at the cottage from year to year.

We use the cottage from time to time
through a 3 1/2 month period (JUNE, July, August &
(P2 class) 1/2 of September) Our cost works out to 250⁰⁰ month (approx)
If we use the 350/kwh category our new cost will be
 $\$100 \times 20 = \2000
 $\$2000 \div 12 = \166.67
 $\$166.67 + 54.31 = \220.98 monthly. This is an increase
of \$128.49 — QUITE REDICULOUS

To add insult to injury the government adds TAX

Surely the OEB can do better to modify this
Hydro plan.

Yours Sincerely,

Norman Stewart
