Thanks for the opportunity to comment, although, it is clear that it doesn't matter what my view or concern is as the posting is only really for information purposes.

The R2 Class property listed above is only accessible in the snow-free season as the road is not plowed for the last 6 km into the property. This is different than the vast majority of properties that will have to pay more. I suspect that the differential billing was, in part, to consider properties that have year round access rather than the circumstances of my camp and my neighbours.

I therefore respectfully ask you to reconsider the decision that was made on changing the rates for R2 Class as a blanket approach. I know some people will not be able to afford such a significant rate increase. That means a poorer quality of life for seniors.

sincerely,
DP
