Re EB-2020-0246

As a Hydro One Customer who is about to be subjected to a doubling of Rates it appears that the OEB has already drawn their conclusion to permit this .

When Hydro One doesn't follow proper procedures apparently that's all OK with the OEB. It would require a lawyer to understand the documentation provided. Talks of "Hearings" appear to be little more then an attempt to look fair. The bottom line is Rates will double. "Rate Mitigation" will provide a buffer from a backlash from customers as they slowly get crushed by mounting bills. The letter indicates that people have a right to be involved in this process but little information is provided as to how to accomplish this. This is truly sad for rural customers and highly unfair.
