I can accept that we all have to pay for Hydro. I do not bitch about paying for a product when I need this product and use it. We are presently on the Seasonal billing for our camp / cottage. The months October to May, we do not use the seasonal dwelling, we do not use hydro, there are no appliances nor lights so my consumption is nil. Why do I pay for delivery of a product that I am not receiving. Now we are being taken off of Seasonal and put on Residential which is going to raise my rates even higher. This is just not right.
