This is regards to Case #EB-2020-0246, hydro address [REDACTED]
Due to the current usage which has a minimal average in your terms, Our hydro rate will DOUBLE. therefore if we choose to use this seasonal property more, our cost of electricity would even be more than double of what it currently is which seems very unfair...this is knowing there are residents on our lake that will be in the UR class as permanent residents. You have to supply and deliver to them and it can't be that much more (double) to cost us for actual electricity. Sounds like robbery to me. You need to reassess and since you HAVE to supply electricity, the cost should not have to be burdened by seasonal residents, that on the most part, use your services more than 3/4 of the year. Therefore, I object to your calculations and proposed rates.
Leah Ann Wutzke
