I do not agree with eliminating the Seasonal Class and find it quite disturbing that this money grab would be approved. The so-called Low Density Class is a form of discrimination. It's no fault of ours that our area is not highly populated. Being an owner of an old cottage built in the 70s I am angered to see you want to raise my bill by 100% while the rest of the population sees a discount. Never mind the fact that your hydro poles and lines run right through the middle of my property creating an Easement which makes a large tract of my land unusable. This increase is discrimination and unfair.
