-- Comments --

The elimination of the seasonal rate class is a very unfortunate and unwarranted step in the overall energy management system in the Province. It will heavily impact me as a low user who already is extremely careful about our energy consumption and who manages our usage carefully--the estimate provided is that my bill will double since i usually only use about 50 to 70 Kwh per month. The mitigation measures must be improved prior to this application being approved.

Thanks

John Macintyre
