We are writing about our seasonal home located on Parry Island.  
Part of this island is a Reserve. There are about 230 cottagers who lease from Wasausink Lands. We do not agree that we should be moved to Low Density (R2) class as Hydro serves about 1000 homes in total on the island. In addition, the island is connected to the mainland by a bridge ;therefore is not difficult to serve. Furthermore, we leave our hydro on year round. We think that medium density (R1) class would be a fairer charge for us.
