

SEC Interrogatory #10

Interrogatory

Reference: A1

Please provide a copy of all benchmarking analyses, reports, opinions and/or assessments, undertaken by, for, or that includes OPG, since 2017, regarding any aspect that directly or indirectly relates to a material aspect of its regulated business that is not already included in this application.

Response

OPG is revising the response to this interrogatory question following the Interrogatories Refusals Discussion meeting on April 23, 2021.

Based on discussions at the Interrogatories Refusals Discussion meeting, OPG reached out to the Executive Leadership Team with the following request:

As part of OPG's OEB rate application, OPG has received an interrogatory request for all benchmarking reports related to benchmarking of OPG's nuclear operations and associated corporate support performed by third parties from 2017 onward. Please forward this request to your direct reports asking that they produce any such reports and forward to me by end of day Wednesday.

OPG provides the following list of cost benchmarking reports resulting from the above request:

- Environment Expenditures, 2017 Forecast

OPG notes that, in the course of developing the Application, it prepared and filed benchmarking reports with its evidence addressing all material aspects of its operations.
