DECISION AND ORDER

EB-2021-0141

KITCHENER-WILMOT HYDRO INC.

Application for Electricity Distribution Licence Amendment

BY DELEGATION, BEFORE: Brian Hewson

Vice President,

Consumer Protection & Industry Performance

May 20, 2021

DECISION AND ORDER

Kitchener-Wilmot Hydro Inc. (KWHI) applied on April 14, 2021, under section 74 of the *Ontario Energy Board Act, 1998* (OEB Act) for an amendment to its electricity distribution licence, ED-2002-0573. On May 17, 2021, KWHI file additional information to complete its application. KWHI is seeking the Ontario Energy Board's (OEB) approval to extend its current exemptions from section 4.2.4A of the Distribution System Code (DSC) and section 2.6.2 of the Standard Supply Service Code (SSSC)¹ to September 30, 2021.

This Decision and Order is being issued by the Delegated Authority, without holding a hearing pursuant to section 6(4) of the OEB Act.

This application follows two prior amendments to KWHI's licence related to the temporary exemption from section 4.2.4A of the DSC and section 2.6.2 of the SSSC (discussed below), that were approved by the OEB.

BACKGROUND

On February 11, 2020, in proceeding EB-2019-0217, the OEB issued a Decision and Order amending KWHI's licence, to exempt it from having to comply with the identified sections of the DSC and SSSC until December 31, 2020. The OEB authorized the exemptions based on the understanding that KWHI was in the process of implementing a new Oracle Customer Care and Billing (CC&B) system, which would meet all the requirements of the amended customer service rules under the DSC and SSSC, with an estimated in-service date on December 31, 2020. The OEB found that it would not be prudent for KWHI to incur significant costs to customize its existing COBOL-based in-house Customer Information System (CIS), which was in the process of being replaced.

On October 30, 2020, KWHI filed a second application with the OEB for an extension of the period for which the utility would be exempt from compliance with section 4.2.4A of the DSC and section 2.6.2 of the SSSC. KWHI requested that the exemption period be extended to June 30, 2021. KWHI's rationale for the extension request was that due to challenges related to the COVID-19 pandemic and the unplanned changes to legacy

¹ Both of these sections are amendments to the respective codes, which came into force on March 1, 2020, as per the Ontario Energy Board's March 14, 2019 notice of amendments to the DSC, the SSSC, and the Unit Sub-Metering Code and Gas Distribution Access Rule (GDAR) – EB-2017-0183.

CIS in order to process billing for customers opting out of Time of Use (TOU) price effective November 1, 2020, it has been forced to delay the implementation of the new CC&B system until April 2021. On December 17, 2020, the OEB granted the application and approved an amendment to KWHI's licence which exempted the utility from compliance with the identified sections of the DSC and SSSC until April 30, 2021 (EB-2020-0259).

APPLICATION

In its latest application, KWHI submits that it is not able to meet the April 30, 2021 deadline. KWHI states that the implementation of its new CC&B system has been a challenging project for KWHI. Although a significant portion of the project has been substantially completed, due to many unplanned policy and pricing changes and the introduction of new customer support programs stemming from the COVID-19 pandemic that were extremely time and resource consuming, the implementation of the new CC&B system has been further delayed to September 2021.

KWHI states that it will continue to take appropriate steps to address customer concerns in relation to non-payment of accounts and disconnection notices as part of its regular customer services. KWHI also states that it continues to work with its customers and will only resort to disconnection when all other solutions have been exhausted (i.e., LEAP, CEAP or arrears payments agreements).

FINDINGS

The OEB accepts that unplanned additional changes to KWHI's legacy CIS have required resources to be taken away from the implementation of the new CC&B system and that, together with ongoing challenges related to the COVID-19 pandemic, has resulted in a further delay to the implementation of KWHI's new CC&B system. The OEB finds this delay reasonable in the circumstances. Therefore, in accordance with its earlier findings that it would not be prudent to require KWHI to incur the costs of adjusting its current CIS to meet the requirements of section 4.2.4A of the DSC and section 2.6.2 of the SSSC, the OEB will extend the period of the licence exemption to September 30, 2021.

The OEB does, however, expect that in the next four months, KWHI will mobilize all its resources and efforts to conclude implementation of its new CC&B system so that it is in operation on September 30, 2021.

IT IS ORDERED THAT:

1. Kitchener-Wilmot Hydro Inc.'s Electricity Distribution Licence ED-2002-0573, specifically Schedule 3 "List of Code Exemptions", is amended to include an exemption from section 4.2.4A of the Distribution System Code. This exemption expires on September 30, 2021.
2. Kitchener-Wilmot Hydro Inc.'s Electricity Distribution Licence ED-2002-0573, specifically Schedule 3 "List of Code Exemptions", is amended to include an exemption from section 2.6.2 of the Standard Supply Service Code. This exemption expires on September 30, 2021.

APPENDIX A

MARKET POWER MITIGATION REBATES

1. Definitions and Interpretations

In this Licence

“embedded distributor” means a distributor who is not a market participant and to whom a host distributor distributes electricity;

“embedded generator” means a generator who is not a market participant and whose generation facility is connected to a distribution system of a distributor, but does not include a generator who consumes more electricity than it generates;

“host distributor” means a distributor who is a market participant and who distributes electricity to another distributor who is not a market participant.

In this Licence, a reference to the payment of a rebate amount by the IESO includes interim payments made by the IESO.

2. Information Given to IESO

- a Prior to the payment of a rebate amount by the IESO to a distributor, the distributor shall provide the IESO, in the form specified by the IESO and before the expiry of the period specified by the IESO, with information in respect of the volumes of electricity withdrawn by the distributor from the IESO-controlled grid during the rebate period and distributed by the distributor in the distributor’s service area to:
 - i consumers served by a retailer where a service transaction request as defined in the Retail Settlement Code has been implemented; and
 - ii consumers other than consumers referred to in clause (i) who are not receiving the fixed price under sections 79.4, 79.5 and 79.16 of the *Ontario Energy Board Act, 1998*.
- b Prior to the payment of a rebate amount by the IESO to a distributor which relates to electricity consumed in the service area of an embedded distributor, the embedded distributor shall provide the host distributor, in the form specified by the IESO and before the expiry of the period specified in the Retail Settlement Code, with the volumes of electricity distributed during the rebate period by the embedded distributor’s host distributor to the embedded distributor net of any electricity distributed to the embedded distributor which is attributable to embedded generation and distributed by the embedded distributor in the embedded distributor’s service area to:
 - i consumers served by a retailer where a service transaction request as defined in the Retail Settlement Code has been implemented; and
 - ii consumers other than consumers referred to in clause (i) who are not receiving the fixed price under sections 79.4, 79.5 and 79.16 of the *Ontario Energy Board Act, 1998*.
- c Prior to the payment of a rebate amount by the IESO to a distributor which relates to electricity

consumed in the service area of an embedded distributor, the host distributor shall provide the IESO, in the form specified by the IESO and before the expiry of the period specified by the IESO, with the information provided to the host distributor by the embedded distributor in accordance with section 2.

The IESO may issue instructions or directions providing for any information to be given under this section. The IESO shall rely on the information provided to it by distributors and there shall be no opportunity to correct any such information or provide any additional information and all amounts paid shall be final and binding and not subject to any adjustment.

For the purposes of attributing electricity distributed to an embedded distributor to embedded generation, the volume of electricity distributed by a host distributor to an embedded distributor shall be deemed to consist of electricity withdrawn from the IESO-controlled grid or supplied to the host distributor by an embedded generator in the same proportion as the total volume of electricity withdrawn from the IESO-controlled grid by the distributor in the rebate period bears to the total volume of electricity supplied to the distributor by embedded generators during the rebate period.

3. Pass Through of Rebate

A distributor shall promptly pass through, with the next regular bill or settlement statement after the rebate amount is received, any rebate received from the IESO, together with interest at the Prime Rate, calculated and accrued daily, on such amount from the date of receipt, to:

- a retailers who serve one or more consumers in the distributor's service area where a service transaction request as defined in the Retail Settlement Code has been implemented;
- b consumers who are not receiving the fixed price under sections 79.4, 79.5 and 79.16 of the *Ontario Energy Board Act, 1998* and who are not served by a retailer where a service transaction request as defined in the Retail Settlement Code has been implemented; and
- c embedded distributors to whom the distributor distributes electricity.

The amounts paid out to the recipients listed above shall be based on energy consumed and calculated in accordance with the rules set out in the Retail Settlement Code. These payments may be made by way of set off at the option of the distributor.

If requested in writing by OPGI, the distributor shall ensure that all rebates are identified as coming from OPGI in the following form on or with each applicable bill or settlement statement:

“ONTARIO POWER GENERATION INC. rebate”

Any rebate amount which cannot be distributed as provided above or which is returned by a retailer to the distributor in accordance with its licence shall be promptly returned to the host distributor or IESO as applicable, together with interest at the Prime Rate, calculated and accrued daily, on such amount from the date of receipt.

Nothing shall preclude an agreement whereby a consumer assigns the benefit of a rebate payment to a retailer or another party.

Pending pass-through or return to the IESO of any rebate received, the distributor shall hold the funds received in trust for the beneficiaries thereof in a segregated account.
