I am opposed to the substantial increase which the Brantford Power Company is requesting. I already pay almost as much for delivery as the hydro. If this 21% increase goes ahead, I will be paying more for delivery than hydro. The increase will add substantial burden for many individuals, families and businesses who are already in a tight spot financially because of Covid inflation. Wages have not increased to the same degree that the Brantford Power company is requesting to increase their delivery fee. Why should the public utilities and the companies which supply them be allowed to profiteer at the expense of the public they purport to serve? The Brantford Power Company should be required to exercise restraint appropriate to the times in which we find ourselves. Local business owners, who are considerate of the clients they serve, do their best to keep their prices in check when they know their clients are suffering financial hardship. They don't plan big capital projects in hard times. We expect the same consideration from our public servants.
