Why are ANY utility companies entertaining increases in energy rates at this time? We haven't yet emerged from Covid-19 issues, the unemployment rate in Canada is 8+%. The economy is still not yet in recovery mode. BEFORE, any energy rate increase Jan 01/2022 or otherwise Brantford Power should show the public their books and justify the posed increase in energy rates.....Here's another beef I don't care if a Residential Rate of 750kWh would be \$5.53 a month, my bill shows kWh usage, my average Summer usage is 380+ and winter is 480+ what will the posed increase cost ME?? That people will bring to the forefront "liars&numbers". I OBJECT to this increase at least until people get back on their feet and can pay their bills!!!!
