I am 28 years old a full time worker and mosy importantly a father to a 5 year daughter , we rent our house and have baseboard heating as you can imagine in winter months our bills can be outrageous, I find it hard to my bills already in the winter months sometimes my hydro bill can reach 300 per month just from heating the main rooms in our home nothing else , how are people supposed to afford to live with rates even higher. The electricity companies already make enough money they don't need regular increases.
