Toronto, Ontario
M4P 1E4

Dear Ms. Long:

**Re: EB-2020-0290 Application by Ontario Power Generation Inc.
For 2022-2026 Payment Amounts ("Application")
D2O Storage Project Video for Hearing**

Ontario Power Generation Inc. ("OPG") is writing to inform the Ontario Energy Board ("OEB") and all Parties to the proceeding that OPG's direct examination of the witness panel responsible for the D2O Storage Project will include a short video tour of the project.

OPG had originally intended to schedule a site tour of the D2O Storage Project. Due to COVID-19 safety protocols and restrictions, OPG was not able to offer this site tour. In lieu of this, OPG has produced this video to provide a virtual walkthrough of the project. The video runs about 7 minutes and is narrated by Peter Simpson, a member of the witness panel. Other than the graphical depiction, which will provide a point of reference to assist the Commissioners and all Parties to the proceeding, the video's content is already in the evidence. Should the Commissioners or Parties have questions on the video's content, the witness panel will be available to respond to them. OPG will also provide access to the video on the public record following the hearing.

If you require any further information or clarification, please do not hesitate to contact me.

Respectfully submitted,

Evelyn Wong
