Grimsby Power has determined its total 2022 service revenue requirement to be \$7,069,531. This total revenue requirement is offset in the amount of \$527,925 which reduces Grimsby Power's total service revenue requirement to a base revenue requirement of \$6,541,606. This base revenue requirement is used to determine the proposed distribution rates. The base revenue requirement is derived from Grimsby Power's 2022 capital and operating forecasts, weather normalized usage, forecasted customer counts, and regulated return on rate base. The revenue requirement is summarized in Table 8 - 1 below:

Table 8-1Calculation of Base Revenue Requirement

Description	Amount
OM&A Expenses	\$4,006,752
Amortization/Depreciations	\$1,320,629
Property Taxes	\$43,800
Income Taxes	\$268,205
Regulated Return on Capital	\$1,430,146
Service Revenue Requirement	\$7,069,531

16 The outstanding base revenue requirement is allocated to the various rate classes

as outlined in Exhibit 7, Tab 2, Table 7-7. The following Table 8-2 outlines the allocation

of the base revenue requirement to the rate classes.

FIXED/VARIABLE PROPORTION

5 Current Fixed / Variable Proportion

Based on applying the existing approved monthly service charges to the forecasted number of customers for 2022 along with the existing approved distribution volumetric charge, excluding rate riders, the adjustment for Low Voltage ("LV") and the transformer allowance, to the 2022 forecasted volumes, the following Table 8-3 outlines Grimsby Power's current split (based on current 2021 rates) between fixed and variable distribution revenue.

Proposed Monthly Service Charge

- Grimsby Power proposes to maintain the fixed/variable proportions assumed in the current rates to design the proposed monthly service charges for each class with the exception of the Embedded Distributor rate class. Grimsby Power proposes to maintain a 50%/50% fixed-variable split for the Embedded Distributor class as per the 2016 settlement agreement.
- 9 The following table outlines the proposed monthly service charge by rate class for 2022.

3 Proposed Volumetric Charges

- 4 The variable distribution charge is calculated by dividing the variable distribution
- 5 portion of the base revenue requirement by the appropriate 2022 Test Year usage,
- 6 kWh or kW, as the class charge determinant.
- 7 The following table provides Grimsby Power's calculations of its proposed variable
- 8 distribution charges for the 2022 Test Year which maintains the same fixed/variable
- 9 split used in designing the current approved rates with the exception of the
- 10 Embedded Distributor rate class.

Proposed Adjustment for Transformer Allowance

Currently, Grimsby Power provides a transformer allowance to those customers that own their transformation facilities. Grimsby Power proposes to maintain the current approved transformer ownership allowance of \$0.60 per kW ("Transformer Allowance"). The Transformer Allowance is intended to reflect the costs to a distributor of providing step down transformation facilities to the customer's utilization voltage level. Since the distributor provides electricity at utilization voltage, the cost of this transformation is captured in and recovered through the distribution rates. Therefore, when a customer provides its own step down transformation from primary to secondary, it should receive a credit of these costs already included in the distribution rates.

The amount of Transformer Allowance expected to be provided to the customers in the General Service >50 to 4,999 kW class that own their transformers has been included in the volumetric charge for this class. This means the General Service >50 to 4,999 kW volumetric charge of \$3.3923 per kW will increase by \$0.1859 per kW to a total of \$3.5782 per kW to recover the amount of the Transformer Allowance over all kWs in the General Service >50 to 4,999 kW class.

RTSRS AND OTHER CHARGES

3.1 RETAIL TRANSMISSION SERVICE RATES (RTSRS)

Grimsby Power is charged the Ontario Uniform Transmission Rates (UTRs) at the wholesale level and subsequently passes these charges on to their distribution customers through Retail Transmission Service Rates (RTSRs). For each distribution rate class there are two RTSRs, one for network and one for connection. The RTSR network charge recovers the UTR wholesale network charge, and the RTSR connection charge recovers the UTR wholesale line and transformation connection charges. Deferral accounts capture timing and rate differences between the UTR's paid at the wholesale level and RTSR's billed to distribution customers. The UTR's used in this application reflect the most recent approved charges effective July 1, 2021 through EB-2021-0176. They also reflect the most recent approved Hydro One Sub-Transmission charges effective January 1, 2021 (EB-2020-0030).

Grimsby Power has completed the 2021 RTSR Workform for Electricity Distributors (v 1.0) to determine the RTSR's and has filed the Workform as part of this application. The RTSR Workform is also provided as Exhibit 8, Tab 3, Attachment 1 in PDF format. Please see Table 8-9 below for the RTSR rates generated from the 2022 Workform.

- 1 The proposed Retail Transmission Network rates are 21% to 23% higher than the
- 2 currently approved Retail Transmission Network rates and Retail Transmission
- 3 Connection rates are 2% to 4% lower than existing Retail Transmission Connection
- 4 rates for each rate class. The proposed changes are consistent with the change in
- 5 Uniform Transmission Rates from January 1, 2020 rates (EB-2020-0180) to July 1,
- 6 2021 rates (EB-2021-0176). Grimsby Power's existing Retail Transmission Network
- 7 rates are underpinned by the January 1, 2020 Uniform Transmission Rates, which
- 8 subsequently increased by 25% from \$3.92/kW to \$4.90/kW effective July 1, 2021.
- 9 This increase is somewhat offset by lower Hydro One Sub-Transmission rate increases.

10 3.2 RETAIL SERVICE CHARGE

- 11 Grimsby Power is not proposing any changes to the retail service charges in this
- 12 application.

13 3.3 WHOLESALE MARKET SERVICE RATES

- 14 On December 10, 2020, the Board issued a Decision and Rate Order (EB-2020-0276)
- 15 establishing that the Wholesale Market Service ("WMS") rate used by rate regulated
- distributors to bill their customers shall be \$0.0034 per kWh effective January 1, 2021.
- 17 This amount includes the Capacity Based Recovery ("CBR") component of \$0.0004 per
- 18 kWh. Furthermore, the same decision approved rate for rural and remote rate
- 19 protection ("RRRP") shall be \$0.0005 per kWh, effective January 1, 2021. Grimsby
- 20 Power has reflected a total charge of \$0.0039 per kWh in this application.

21 3.4 SPECIFIC SERVICE CHARGES

22 Grimsby Power is not proposing any changes specific service charges in this application.

23 3.5 WIRELINE POLE ATTACHMENT CHARGE

- 24 On December 10, 2020, the Board issued a Decision and Rate Order (EB-2020-0288)
- 25 establishing that the Wireline Pole Attachment Charge used by rate regulated distributors
- to bill their customers shall be \$44.50 effective January 1, 2021. Grimsby Power is not
- 27 proposing a distributor-specific wireline pole attachment charge.

Variance from Prior Year		-23,791	-23,381	98,663	128,005	58,072	-44,841

5 Low Voltage charges paid to Hydro One increased materially from 2018 to 2019 due to

6 an increase in Sub-Transmission rates. Rates implemented July 1, 2019 were effective

7 May 1, 2018 so the increase in payments is partially caused increases from 2018

8 foregone revenue. The increase from 2019 to 2020 is due to a combination of rate

increases and increased volumes, particularly among the Residential class. Further

10 increases in 2021 is the result of projected load increases.

11 Forecasted low voltage charges of \$478,224 from Hydro One for 2022 have been

12 allocated to each rate class based on the proportion of proposed retail transmission

13 connection revenue collected from each class.

14 The 2022 Test Year Low Voltage expense of \$480,000 has been estimated based on

2020 charges paid to Hydro One, adjusted to \$472,224 to account for charges rounded

16 to the fourth decimal. The derivation of Low Voltage Service Rates is provided in Table

17 8-11.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Sheet "3. RRR Data". For Hydro One Subtransmission Rates, if you are charged a combined Line and Transformation Connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancies in rates.

LOSS ADJUSTMENT FACTORS

Grimsby Power has calculated the total loss factor to be applied to customers' consumption based on the average wholesale and retail kWh for the years 2016 to 2020. The calculations are summarized in the following Table 8-12 which is consistent with calculations provided in Appendix 2-R of the 2022 Filing Requirements.

The supply facility loss factor (the "SFLF") shown in the above table represents the losses on the supply to Grimsby Power. The SFLF is calculated on the measured quantities between the transformer stations and the wholesale meter points. Grimsby Power has two metering points. One is connected to Hydro One's distribution system and one is directly connected to the transmission grid. Since Grimsby Power is partially embedded, the SFLF has been calculated as the weighted average of 1.0340 on the kWh measured at the metering points connected to Hydro One's distribution system and 1.0045 on the kWh measured at the metering points that are directly connected to the transmission grid. The 5-year average of the supply

- 1 facility loss factor is equal to 1.0147 or 1.47%. The calculation of the weighted average
- 2 SFLF is provided in the following Table 8-13:

RATES AND BILL IMPACTS

5.1 TARIFF OF RATES AND CHARGES

3 The current and proposed tariff of rates and charges is provided below. The current

4 definition of rate classes and the current terms and conditions of service have been

5 maintained in this application for Residential, Street Lighting, Unmetered Scattered

6 Load, and Embedded Distributor rate classes.

7 Grimsby Power proposes to modify the definitions of the General Service < 50 kW and

General Service 50 to 4,999 kW rate classes to change the defined threshold between

the two classes. Grimsby Power's approved tariff schedules describe the General

10 Service < 50 kW class as "identified by the billing system as registering under 50 kW

on a demand meter in any one month of the year" and the General Service 50 to 4,999

12 kW class "is identified by the billing system as registering equal to or over 50 kW on a

demand meter in any one month of the year". General Service customers that have

had peak demands below 50 kW in some months and above 50 kW in other months

were historically classified with the General Service 50 to 4,999 kW rate class.

16 Grimsby Power proposes to classify customers based on average monthly peak

demands. This will be implemented by modifying the currently approved class

definitions with the proposed definitions as provided below.

Approved General Service < 50 kW definition:

This classification applies to a non-residential customer that is identified by the

billing system as registering under 50 kW on a demand meter in any one month

of the year. Class A and Class B consumers are defined in accordance with O.

Reg. 429/04. Further servicing details are available in the distributor's

Conditions of Service.

Proposed General Service < 50 kW definition:

Grimsby Power Inc. Filed: July 30, 2021 EB-2021-0027 Exhibit 8 Tab 5 Page 2 of 7

This class pertains to non-residential customers taking electricity at 750 volts or less whose monthly average peak demand is less than, or forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

Approved General Service 50 to 4,999 kW definition:

This classification applies to a non-residential customer that is identified by the billing system as registering equal to or over 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

Proposed General Service 50 to 4,999 kW definition:

This classification applies to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

As described in Exhibit 3, the reclassification results in a shift in consumption, demand, and customer counts from the General Service 50 to 4,999 kW class to the General Service < 50 kW class. The rates proposed in this application reflect the proposed definitions such that forecasts that include the consumption, demand, and customer counts of the reclassified customers within the General Service < 50 kW class.

For the current tariff of rates and charges from the current approved decision and rate order EB-2020-0025 dated December 10, 2020 effective January 1, 2021, please see Exhibit 8, Tab 5, Attachment 1.

25 For the proposed tariff of rates and charges please see Exhibit 8, Tab 5, Attachment 2.

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.
