

Say No

to a new nuclear reactor in the GTA

Ontario Power Generation (OPG) wants to build a new nuclear reactor in Canada's largest urban area. It's a terrible idea and a terrible location.

Nuclear is the **most expensive** way to keep our lights on and after more than 50 years of operations, OPG still doesn't know what to do with tens of thousands of tonnes of **deadly radioactive waste** stored next to Lake Ontario.

Renewable energy is now **less than half the cost** of new nuclear and completely safe. We don't need a **new unproven** nuclear reactor in our backyard.

**Sign the petition opposing a
new nuclear reactor in the GTA**
