Ontario Energy Board

**RE: Rate Increase – Canadian Niagara Power
File Number EB-2021-0011**

We have recently moved to the Stevensville area and just heard about the request from Canadian Niagara Power to increase the electricity distribution rates. The rate increase is going from \$4.50 per month to \$5.33 per month. We do not agree with this electricity distribution rate increase. We believe this is a huge increase and should not be considered. There are many reasons and the main reason is due to COVID. As Ontario and the World has not returned to normal and will not return to normal for some time, I believe it would be irresponsible at this time to increase the rates at this time. This rate increase would cause us undue harm for additional expenses which is unfair to us.

Other utility boards have not requested to increase their electricity distribution rates and this should be another issue the OEB considers.

Thank you for your consideration.

Sincerely,
Larry & Sheila Harper
