## DECISION AND ORDER

Terra International (Canada) Inc. (Terra Canada), filed an application on June 21, 2021, with the Ontario Energy Board (OEB) pursuant to section 60 of the *Ontario Energy Board Act, 1998* (OEB Act), for an electricity wholesaler licence.

This Decision and Order is being issued by the Delegated Authority pursuant to Section 6 of the OEB Act. The Delegated Authority has considered the application without holding a hearing pursuant to section 6(4) of the OEB Act.

Terra Canada is a manufacturer of hydrogen and nitrogen products for clean energy, emissions abatement, fertilizer and other industrial applications and the applicant operates the Courtright Nitrogen Manufacturing Complex in Courtright, Ontario. Terra Canada has an electricity generation licence authorizing the ownership and operation of a 20 MW generation facility located in Courtright, Ontario.

The applicant has applied for an electricity wholesaler licence because its generation facility at the Courtright Nitrogen Manufacturing Complex generates power only for its own consumption. Terra Canada has stated that it does not generate electricity for sale or provide ancillary services for sale. To supplement the electricity that the facility generates, Terra Canada purchases power from the Independent Electricity System Operator (IESO) - administered markets. The applicant has requested that its electricity generation licence EG-2000-0299, which is set to expire on September 15, 2021 be disposed of upon expiry, as the applicant states it will continue conducting business under the electricity wholesaler licence.

After considering the technical and financial capability of the applicant, the OEB finds that it is in the public interest to grant the application and issue the electricity wholesaler licence to Terra International (Canada) Inc.

**IT IS ORDERED THAT:**

1. The application is granted, on such conditions as are contained in the attached licence.
