I am very concerned to hear an increase/additional cost being proposed. In my time living in Belfountain I have not seen an improvement nor a consistent support level to require/demand this increase. Why should this increase be allowed considering that we are still in a pandemic and many people are out of a job or with limited work opportunities. Electric rates and distribution rates should not be increased in costs with the customer. Rather the company should be looking for savings/efficiencies within their own internal departments/infrastructure.
