This is appalling, due to the pandemic people have fallen on financial hardships, the proposed increase in rates is tasteless and heartless. With the majority of the workforce working from home, we are already consuming more electricity and our monthly bills reflect that. Clearly the increased revenue from increased usage is leading to greater profits for these power companies and their executives. Masquerading the increased usage being a reason to increase rates is laughable, this is a blatant ploy to further extract more money from an already suffering client base. It might be quite apparent by my comment however I oppose a rate increase.
