I am begging you not to raise the price of hydro. At this point it is already too expensive! How do you expect people to pay their hydro bills when we can barely make the payments as it is!? Are you nuts!? Living in Canada is already expensive enough, you're making this an even more miserable country to live in with these kinds of changes. It makes absolutely no sense to raise the price of hydro when you're already robbing us every month. It's unfair to take advantage of us hard working citizens that are just going to work to pay off bills every month. The fact that there is only ONE company to deliver hydro in Canada is a joke. In the states they have multiple companies which you can choose who has the lowest price. It's sickening that we don't have a choice in this country and that we are taken advantage of. You should be ashamed of yourself for being so greedy. Think of the people for once.
