There is insufficient information provided by OEB to judge the adequacy of Hydro One's application for a rate increase. The key issue is how will the rate increase affect Hydro One's bottom line, that is, its rate of return to equity capital. Hydro One is a publically traded company controlled by the Ontario government and individual shareholders of Hydro One have little recourse to ensuring that their investment in Hydro One has an adequate rate of return. Hydro One's financial information and pro forma projections over the period of the application have therefore the utmost importance. Please provide this information before the hearing and allow sufficient time to review it.
