**RE: Enbridge Gas Distribution Inc.  
Application for Licences to Drill Natural Gas Storage Wells  
in the Corunna Storage Pool and the Ladysmith Storage Pool (Designated  
Natural Gas Storage Areas)  
OEB File No.: EB-2021-0079**

Dear Ms. Long:

We are writing to request that we; Claire and Helen Robbins as landowners to the proposed TL8 well be granted intervenor status in the above-noted matter.

We believe proposed well TL8 will infringe on our farming infrastructure and future development of buildings and residential sites.

Recent work on TL9 (which was located 635 metres from our residence) produced excessive noise, vibration and lighting distractions which brought concerns for both our health and the health of our livestock. Noise and vibration from the project were heard and felt in our home and in combination with the project lighting at night, our sleep was impacted. We noticed a change in the behaviour of our livestock, their food consumption, and a disruption in reproduction. Since proposed well TL8 will only be 175 metres from our residence and livestock facilities, we feel this disruption will be magnified.

We are not the only landowners in the area with concerns about this and other projects with Enbridge Gas Distribution Inc. Past working relationships between Enbridge Gas Distribution Inc. and our family have been challenging at best with little result. Two current and ongoing projects include:

- 2020 Depth of Cover Remediation NPS 10 Payne Kimball Line
- Well site #T009043 (Plug Date 2016-10-14) well site rehabilitation still not complete after multiple requests.

The Ontario Energy Board sites in its cover letter for projects, “Our goal is to promote a financially viable and efficient energy sector that provides you with reliable energy services at a reasonable cost.” As local landowners, we find it ironic that we are involved in the 2021/2022 Storage Enhancement Projects yet have no access to residential natural gas.

Thank you for taking the time to review our concerns and look forward to your response.

Kind regards

Claire and Helen Robbins
