We understand that all things increase in price over time but the distribution rates of Hydro need to be shared equally across the province.

It's not fair that people living in rural communities are paying almost as much for the distribution as for their usage. It's making it so that all people are going to have to move into the cities to be able to afford their hydro bills and leave no rural communities or farmers. Anyone should be able to see that this will not be a suitable solution for the economy. Something needs to be done now!
