Hi We are on a property that is water access only. I have been told I am in the group that will have the highest increase for hydro. Other companies like telcos are not allowed to charge these types higher rates for these same areas. The costs associated with maintaining rural areas are no different.

Why doesn't hydro one trim the fat like other companies have done. They are a monopoly and we have no choice. Db pensions and post retirement benefits for example can be changed to DC and ppb gone . Hiring back employees as soon as they retire instead of hiring and training young people. They look to the easy way of gouging instead if being a smart business. This is what happens with no competition. Laziness
