**Re: EB-2021-0002 Enbridge Multi-Year Demand Side Management Plan  
Pollution Probe Letter**

Dear Ms. Long:

Pollution Probe is in receipt of the OEB's Decision on Issues List and Procedural Order No. 3, dated September 9, 2021. Pollution Probe is also in receipt Enbridge's letter dated September 1, 2021 requesting an extension to file evidence updates. On review of the materials, it has become evident that the date set by the OEB for a letter from parties that intend to file any evidence in this proceeding is now before the date that parties will receive the updated evidence from Enbridge.

Pollution Probe is actively in discussion with stakeholders on coordination of evidence, but would not be in a position to finalize those discussion in a manner that ensures it is not duplicative of the updated Enbridge evidence until following September 30, 2021. Pollution Probe requests that the date be extended to October 11, 2021 for parties to file a letter indicating their intention to file evidence in the proceeding.

Respectfully submitted on behalf of Pollution Probe.
