I am strongly opposed to increasing rates. Ontario already has significantly higher rates than our neighbor's (Quebec). Our manufacturing sector are struggling to compete now and our economic situation is already weak, higher rates will negatively impact any recovery plan, companies have and will go somewhere else. Competitive electricity is key to manufacturing ... manufacturing provides jobs, people with jobs pay taxes and buy things stimulating the economy. Hydro one should look at ways to reduce their operating cost rather than increasing rates. The effect of this increase will have dire long term effect on the people of Ontario.

Thankyou for being an advocate for the people of Ontario.
